

Viewpoint Golf & RV Resort Residents Have an Alternative Choice for Quality High Broadband Service

Last Mile Communications, Inc., has the perfect solution for those people who want a higher level of service for high speed internet services, **WYDEBEAM BROADBAND**.

Our DSL style delivery system promotes a winning combination for Viewpoint's seasonal residents, as there are no contracts, no installation fees and no summer time rates. The service will be delivered over the phone line that already runs to the home. Both voice and data traffic can operate at the same time, with the use of a line filter, which is supplied. A modem is required to transfer the phone line copper pair into a data cable. We will charge \$65.00 plus \$5.23 of Mesa city sales tax., or \$70.23 total.

The monthly service will be \$39.99, no taxes, no other charges. The ongoing billing will be done via credit or debit card, in 30 day increments from the day that you start services. Please think ahead, we will not be issuing refunds when it's time to go home and you were not there for the whole month. The speed of the service will be 1 meg download and 512 upload.

In order to have more than one computer on the internet at the same time, a router is required. The cable from the modem just plugs into the router instead of the single computer. A router can be wireless, but we would like all of the routers using our service to be secured and we will help those customers who need help with that for free. No customer should broadcast internet to neighbors, which is illegal according to our Terms & Conditions, and no one should want their computers available to hackers.

Installation does NOT include fixing virus laden computers, installing software, or spending time teaching customers how applications work. However, IT Services are available for a fee.

Our Residential Service packages include:

- 5 free email accounts per customer - Unlimited data transfer - 7 Day a week support**
- Always on connection - Rapid installation - Secure -**
- Not A Satellite or Radio - Blazing fast speeds**
